

Sixth Grade - Equation and inequalities

1) Solve the following: Single variable simple linear equations $x - 89 = 2$?

- 125
- 214
- 101
- 324

2) Solve the following: Single variable simple linear equations $y - 21 = 39$?

- 40
- 65
- 60
- 50

3) Solve the following: Single variable simple linear equations $12 = m \div 18$?

- 312
- 168
- 198
- 216

4) Solve the following: Single variable simple linear equations $P \div 7 = 4$?

- 32
- 28
- 41
- 48

5) Solve the following: Single variable simple linear equations $x \div 8 = 5$?

- 40
- 32
- 24
- 46

6) Solve the following: Single variable simple linear equations $2x - 6x + 12 - 26 + 5x = 40$?

- 43
- 24
- 34
- 54

7) Solve the following: Single variable simple linear equations $5p - 14 + 3p + 4p - 25 - 9p = 57$?

- 32
- 22
- 24
- 36

8) Solve the following: Single variable simple linear equations $-2s + 23 + 15 - 6s + 5s = -1$?

- 18
- 22
- 34
- 13

9) Solve the following: Single variable simple linear equations $3(x + 4) = 30$?

- 6
- 4
- 8
- 5

10) Solve the following: Single variable simple linear equations $5(a - 2) = 0$?

- 2
- 6
- 4
- 8

11) Solve the following: Single variable simple linear equations $4a + 3(a - 2) = 1$?

- 7
- 1
- 6
- 2

12) Solve the following: Single variable simple linear equations $a + 2(a - 7) = 1$?

- 8
- 4
- 3
- 5

13) Solve the following: Single variable simple linear equations $3x + 4(x + 2) = 22$?

- 6
- 2
- 5
- 8

14) Solve the following: Single variable simple linear equations $7p - 3(p + 4) = 8$?

- 5
- 9

- 7
- 3

15) Solve the following: Single variable simple linear equations $5x = 7(x - 2)$?

- 7
- 6
- 4
- 9

16) Solve the following: Single variable simple linear equations $2(x - 5) = 6(1 - x)$?

- 4
- 6
- 8
- 2

17) Solve the following: Single variable simple linear equations $5(y + 8) = 3(y + 20)$?

- 10
- 22
- 44
- 32

18) Solve the following: Single variable simple linear equations $6(p - 8) = 2(4 - p)$?

- 4
- 8
- 7
- 9

19) Solve the following: Single variable simple linear equations $5x - 3 = 3x + 7$?

- 6
- 12
- 5
- 8

20) Solve the following: Single variable simple linear equations $y = 2 - 2[2y - 3(1 - y)]$

- $4/13$
- $10/14$
- $9/10$
- $8/11$

21) Solve the following: Single variable simple linear equations $2x + 5 = 10 - 3x$

- 6
- 9
- 3
- 1

22) Solve the following: Single variable simple linear equations $8x + 8 = 5x + 19$

- $13/4$
- $12/8$
- $16/3$
- $11/3$

23) Solve the following: Single variable simple linear equations $5x - 3 = 3x - 5$

- -7
- -1
- -4
- -8

24) Solve the following: Single variable simple linear equations $4p + 2 = 9 - 3p$

- 8
- 6
- 4
- 1

25) Solve the following: Single variable simple linear equations $6x - 5 - 2x + 3 - 2 = 4$

- 8
- 4
- 2
- 6

26) Solve the following: Single variable simple linear equations $m + 13m - 13 = 15$

- 6
- 2
- 4
- 8

27) Solve the following: Single variable simple linear equations $7 = 8 + 5j - 9 + 3j$

- 9
- 2
- 1
- 6

28) Solve the following: Single variable simple linear equations $d + 8 - 14 + 14d = 39$

- 9
- 4
- 8
- 3

29) Write the following statements to a mathematical inequality in one variable: The square of m is greater than zero?

- $m > 0$
- m
- $m^2 > 0$
- m^2

30) Write the following statements to a mathematical inequality in one variable: The absolute value of the opposite of k is greater than 2?

- $|-k|$
- $|-k| > 3$
- $|-k| > 8$
- $|-k| > 2$
