

Eighth Grade - Statistics and Probability

1) Determine whether a scatter plot of the data for the following might show a positive, negative, or no relationship. A person's jogging speed and time spent jogging.

- No relationship
- Negative relationship
- Cannot be Determined
- Positive relationship

2) Determine whether a scatter plot of the data for the following might show a positive, negative, or no relationship. The size of a family and the weekly grocery bill.

- Cannot be Determined
- Negative relationship
- No relationship
- Positive relationship

3) Determine whether a scatter plot of the data for the following might show a positive, negative, or no relationship. The size of a car and the cost.

- Negative relationship
- Cannot be Determined
- Positive relationship
- No relationship

4) Determine whether a scatter plot of the data for the following might show a positive, negative, or no relationship. A person's weight and percent body fat

- No relationship
- Negative relationship
- Cannot be Determined
- Positive relationship

5) Determine whether a scatter plot of the data for the following might show a positive, negative, or no relationship. Time spent playing video games and time spent on outdoor activity

- Negative relationship
- Cannot be Determined
- No relationship
- Positive relationship

6) What kind of trend do you see in the scatter plot?

- Data is insufficient
- Positive trend
- Negative trend
- No trend

7) What kind of trend do you see in the scatter plot?

- No trend
- Negative trend
- Data is insufficient
- Positive trend

8) What kind of trend do you see in the scatter plot?

- Positive trend
- Data is insufficient
- Negative trend
- No trend

9) What kind of trend do you see in the scatter plot?

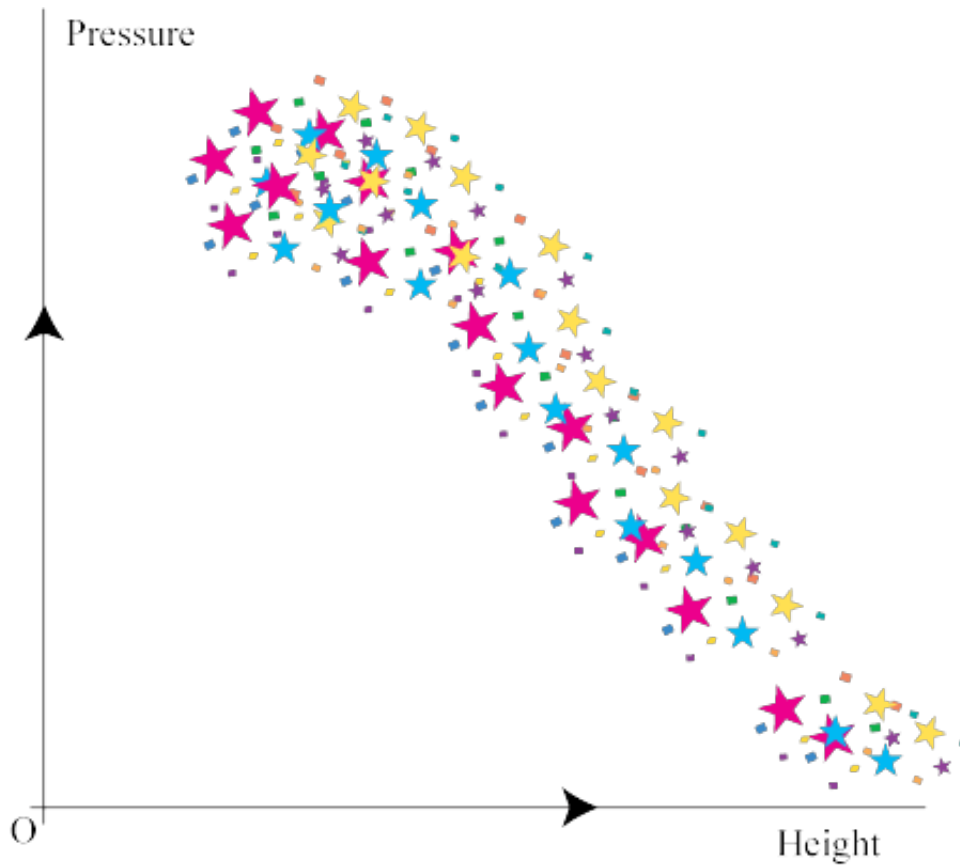

- No trend
- Positive trend
- Data is insufficient
- Negative trend

10) What kind of trend do you see in the scatter plot?

- Data is insufficient
- Negative trend
- Positive trend
- No trend

11) Which of the following is a correct statement based on the scatter plot shown below?

- There is no association between pressure and height
- As pressure increases height also increases
- As pressure decreases height increases
- As pressure decreases height also decreases

12) Which of the following is a correct statement based on the scatter plot shown below?

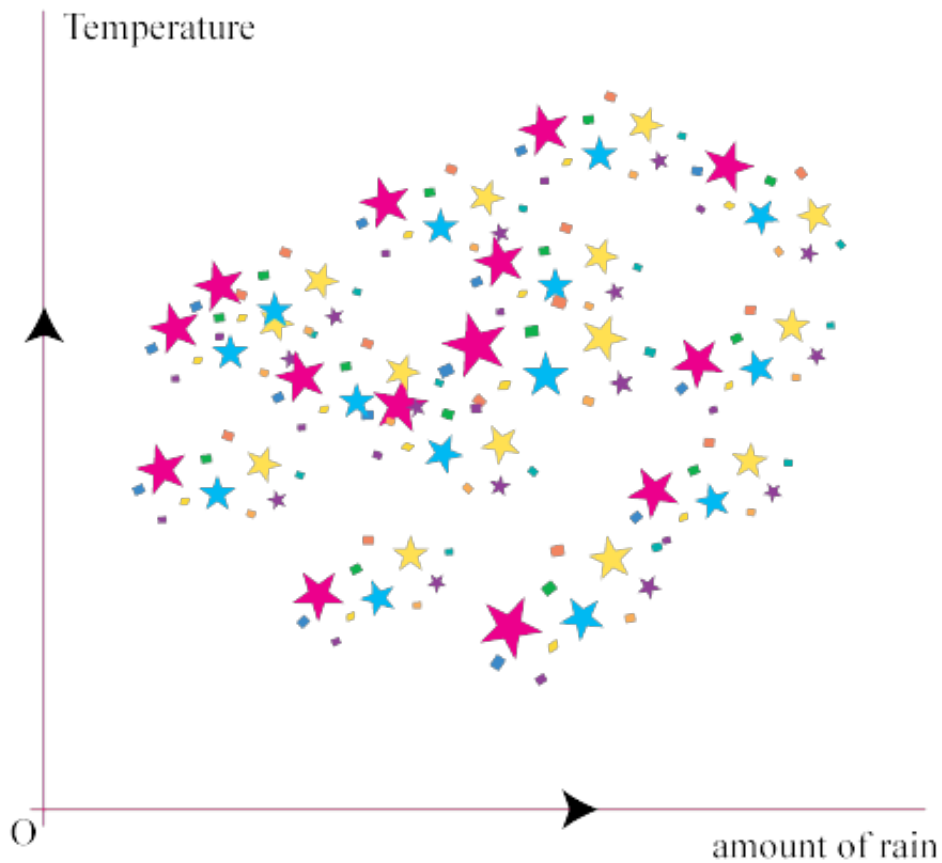

- As maths grade decreases science increases
- As maths grade increases science grade also increases
- As maths grade decreases science grade also decreases
- There is no association between maths grade and science grade

13) Which of the following is a correct statement based on the scatter plot shown below?

- As weight decreases height increases
- As weight decreases height also decreases
- As weight increases height also increases
- There is no association between weight and height

14) Which of the following is a correct statement based on the scatter plot shown below?

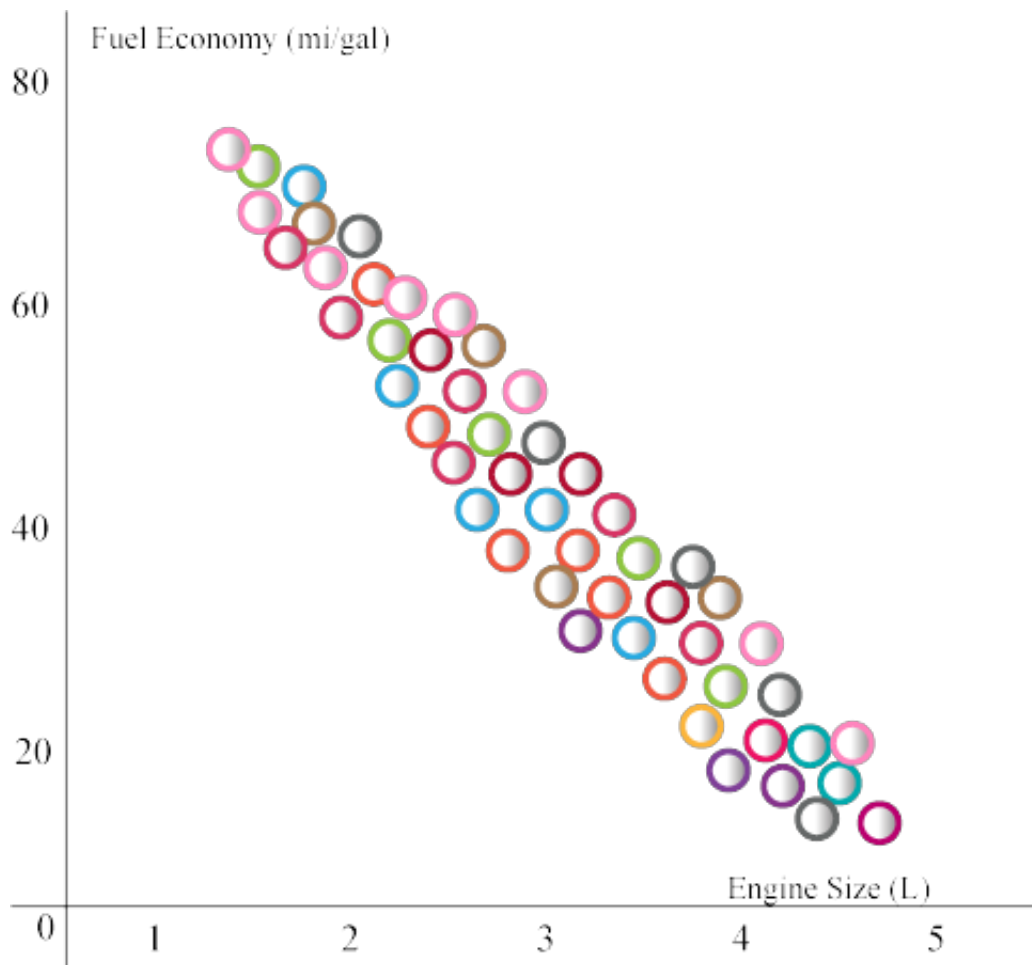

- There is a strong negative relation between the variables
- There is a positive relation between the variables
- There is a no relation between the variables
- There is a strong positive relation between the variables

15) Which of the following is a correct statement based on the scatter plot shown below?

- There is a no relation between the variables
- There is a positive relation between the variables
- There is a negative relation between the variables.
- There is a strong negative relation between the variables

16) Write positive association, negative association, no association or non-linear association to describe the relationship

- No Association
- Non-linear Association
- Positive Linear Association
- Negative Linear Association

17) Write positive association, negative association, no association or non-linear association to describe the relationship

- Negative Linear Association
- Non-linear Association
- No Association
- Positive Linear Association

18) Write positive association, negative association, no association or non-linear association to describe the relationship.

- Positive Linear Association
- Non-linear Association
- No Association
- Negative Linear Association

19) Write positive association, negative association, no association or non-linear association to describe the relationship

- Positive Linear Association
- Non-linear Association
- No Association
- Negative Linear Association

20) Select the best description the association between forearm length and foot length

- Negative association
- No association
- We cannot fit a straight line
- Positive association

21) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association"

- Strong positive association
- Weak negative association
- No association
- Weak positive association

22) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association", "strong negative association", "Non-linear association"

- No association
- Weak negative association
- Strong positive association
- Weak positive association

23) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association", "strong negative association", "Non-linear association"

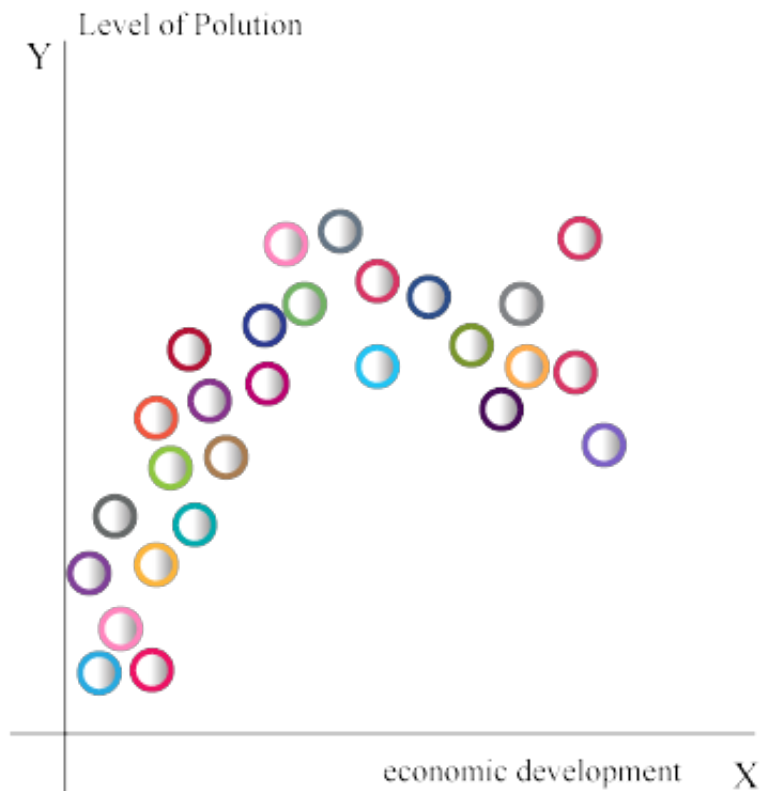

- Weak positive association
- Strong positive association
- No association
- Weak negative association

24) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association", "strong negative association", "Non-linear association"

- Strong positive association
- No association, or no correlation between X and Y
- Non-linear association
- Perfect positive association

25) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association", "strong negative association"

- Non-linear association
- Perfect positive association
- Strong negative association
- Weak negative association

26) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association", "strong negative association", "Non-linear association"

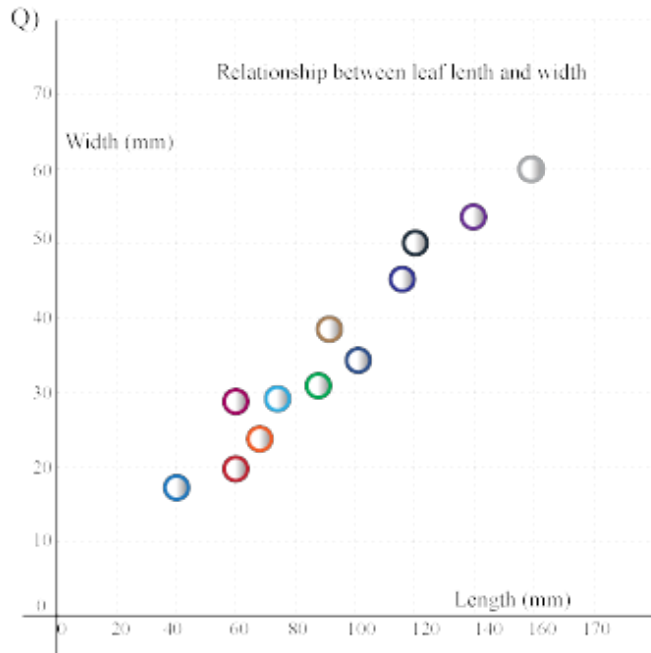

- Perfect positive association
- Non-linear association
- Weak negative association
- Strong negative association

27) Match these labels to the diagrams: "no association", "strong positive association", "weak positive association", "perfect positive association", "perfect negative association", "weak negative association", "strong negative association", "Non-linear association"

- Non-linear association
- Strong negative association
- Perfect positive association
- Weak negative association

28) The length and width of 10 leaves are shown below on the scatter diagram, using a straight edge draw a suitable line of best fit

a)

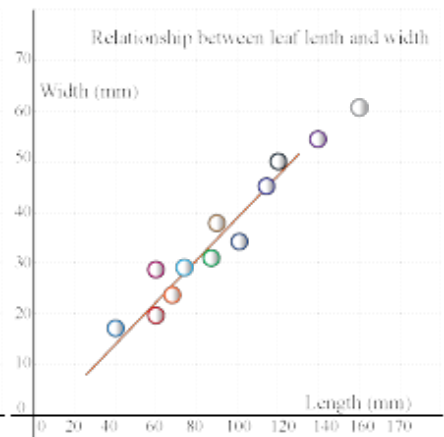

b)

c)

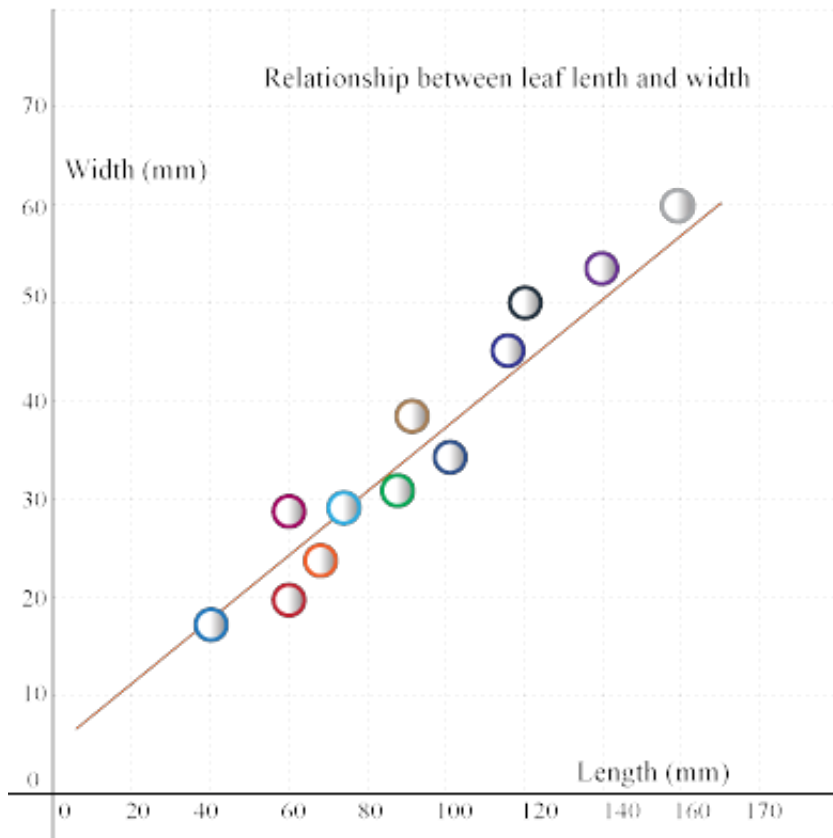

d)

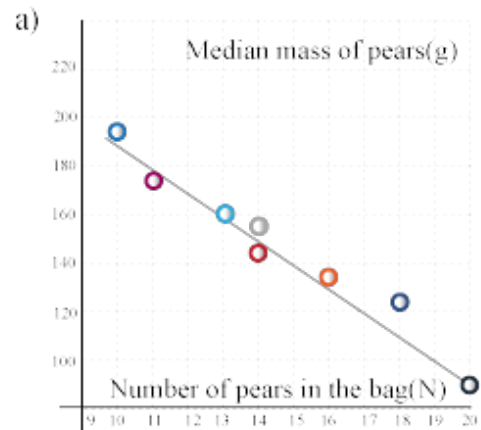

- d
- a
- b
- c

29) The length and width of 10 leaves are shown below on the scatter diagram, write a sentence describing the relationship between leaf length and leaf width for this sample.

- Length decreases, width increases
- Length increases, width decreases
- Length decreases, width decreases
- Length increases, width increases

30) Emily is investigating the sizes of pears in 2 kg bags with the help of the scatter diagram shown below: Using straight edge draw a suitable line of best fit.

b)

c)

d)

- d
- b
- a
- c
